UV LASER MARKER - AIR COOLED

UV lasers permanently mark (engrave) metals, plastics, ceramics, organics and more, without the thermal impact of conventional lasers. New Air-cooled design offers energy efficiency without the need for a separate water chiller, perfect for businesses with limited space or that require portable marking solutions. Mark on larger items with this open platform design and a 160mm x 160mm (6.29" x 6.29") work area, which is 40% larger than the "standard" 110mm x 110mm offered by other manufacturers. Larger work areas, water cooling and 10 watt models are available, call for details.

UV Laser Marker Includes:

- 3w or 5w UV Marking Power
- 6.29" X 6.29" Marking Area
- Designed & Engineered In USA By Boss Laser
- Rotary Chuck Options
- Mobile Desktop With Open Marking Platform
